Description:

FORWARDING FOR WIRELESS PHONES

PATENT

Or PATENT

REQUEST FOR RECONSIDERATION

Mail Stop AF Commissioner for Patents P.O. Box 1450 Alexandria VA 22313-1450

Dear Sir:

This is submitted in response to the final office action mailed March 28, 2006 in the above matter. No claim amendments are presented. A copy of the claims is attached to the end of this Request for Reconsideration.

Applicants request reconsideration of the final action because the applicants respectfully believe that the rejection of the claims is based on a misunderstanding of the Byrne reference, U.S. patent 6,708,028, and that Byrne is not properly cited against the feature of the claims of "automatically transmitting a second feature code from said mobile station to a wireless network when said signal strength rises above said threshold level, said second feature code deactivating said call forwarding."
